Newsletter # 6 - Opening Night for 2009/2010 Season!

Opening night at Hawkes Bay has been and gone, the team and I had a busy week getting the car ready to go, things were looking on target until our sign writer no longer had time to do the car, I spent a long time (I can't say how long because I was at work, lol) going through the phone book looking for anybody to get the car done, I never knew there were so many sign writers in the Bay, all of which were too busy being HB show week etc, I had a few say they may be able to fit it in, but I needed someone to say yes, we can do it!

I got hold of Craig at Speedy Signs in Hastings and that's just what he said, good enough for me, the next day the car was in his shop, His team only had one day to get the car done including all the design work, Friday here being a holiday, "just ring when its done" I told him, well seven o'clock that night he did ring to say they were done, great to see people who really want your business and are happy to do overtime to get it, and what a job they have done, I think you will agree the car looks pretty good, so big thanks to the team at Speedy Signs for a great effort.

After a late night on the car Friday and some finishing Saturday morning we were ready to go, nice weather and we were off racing. Not having a run in the car before opening night we just did our set-up and hoped it would turn left at the end of the straight, the car ran pretty good and we finished the first race mid pack, with a few small changes we hit the second race and didn't really get it right finishing mid pack again, a small change again and deciding I would have to drive better seemed to work for the feature race, finding some form and getting home second, so all up not a bad first night, its already clear we are in for a big season here in the Bay with what you can tell is going to be hard fast racing, I need to say a big thank you to all our sponsors as the car would not be racing without them, for now thanks for taking a look at the site.
